

# Linguistic

Linguistic is the study of language, whereas language is the method and means to allow persons to communicate with precision.

For a better explanation of what linguistic compels one might consider <http://linguistics.ucsc.edu/about/what-is-linguistics.html> for more detail "or" to subdue an interest.

This writer has for a time placed "or" and "and" within quotations, the reason is to reflect that there is a distinction between "and" and "or". One factor relevant between both "and" and "or" is that they both are coordinating conjunctions. To avoid rolling 11 in a Las Vegas casino remember there are 7 coordinating conjunctions. Comprehension is needed to apply written wording to whatever, no sexual pun intended. For some of us the term whatever is a clean version of stating \*uck you. Therefore an increase of wisdom is required in the world of linguistics.

Back to "and" or "or", it is either black or white "or" is it to be black "and" white (grey) for those who believe "and" is appropriate.

Arrogance, regardless of how obtained interferences with many areas of those who claim to be learned "and/or" or wise. Wisdom when not applied correctly will result in an incorrect resolution.

What is of concern to this writer is how long will it be (Beatles- Let It Be) before the judiciary realizes the integrity of the court under Article III will place the court in the same position as the government to part II of the Constitution, power of the pen shall replace that that has failed the people of this country.

**Wisdom, Chose Wisely**
