

Underlying - REMIC-Tax Status Foreclosure v Tax Evasion

Underwriters of the Investment Vehicles failed to follow the Requirements of the Trust by not following the laws that govern the homeowners promissory note and security instrument. The rating agencies failed to note that the underlying collateral was non compliant with governing laws.

As such, the REMIC status is in question.

The underlying collateral (homeowners promissory note and security instrument) is governed by tangible laws affecting real property while the investment vehicle is governed by intangible laws affecting personal property.

The Underwriters are the BANKS.
Now we know why the crooks label everybody deadbeats!!!
